Experience

Peer2Play

Product Designer

Jan 2025 - Present
Bangalore

- Led design for key product areas including an MPC wallet, gaming dashboard, and full website revamp for both Web2 and Web3 users.
- Collaborated with cross-functional teams to define user flows, and support marketing design needs including social media visuals.
- Contributed to product improvements through usability enhancements, resulting in increased retention and product visibility.
- Drove visual consistency across product and brand touch points, reinforcing the overall user experience.

NetSepio

UI/UX Designer

Jan 2023 - Nov 2024
Bangalore

- Managed end-to-end design of B2B SaaS security tools, handling multiple projects simultaneously.
- Delivered user-centered prototypes and, supporting data-driven decision making.
- Partnered with marketing to align visual branding with product design, improving the company's external identity and internal usability.

Designdrug

Build 2.0

June 2023 - Aug 2023
Remote

- The 90-day design challenges in the Designdrug community sharpened my skills and helped me tackle design problems more efficiently, improving my creativity and technical abilities
- I explored motion design and animations, which expanded my skill set and allowed me to incorporate dynamic elements into my work, enhancing user engagement and experience

Shardeum

Freelance Graphic Designer

Nov 2022 - Jan 2023
Remote

- Designed social media creatives and branding assets to support marketing launches in the blockchain space.
- Ensured visual consistency and timely delivery across fast-paced campaigns.

10k Designers

Brand Experience Design

Cohort 02

Oct 2022 - Dec 2022
Remote

- I learned how to solve complex design challenges using storytelling and design methodologies, ensuring user-centric and impactful results
- I developed skills in creating brand identities, logos, and UI/UX designs, which I now use to create cohesive brands and user-friendly digital assets

Blockflow

Web Designer, Intern

Jul 2022 - Jan 2023
Remote

- Designed intuitive, scalable web interfaces for blockchain-based tools, focusing on usability for technically inclined users.
- Created comprehensive design documentation, including style guides and onboarding flows for product teams.
- Helped improve engagement through streamlined UI decisions, reinforcing the brand's visual identity in Web3.

Orbit Labs

Freelance Web Designer

Dec 2021 - Jul 2022
Remote

- Delivered clean, functional UI designs for DeFi products, balancing visual appeal with information clarity.
- Developed strong brand systems and user-first flows for technical products, improving clarity for core user groups.
- Contributed to the company's visual strategy, helping align product and marketing communication.
